EXPERIENCE

Amazon

Hyderabad, India

Software Development Engineer

Jan. 2024 – May 2025

- Led backend implementation of FCSKU-level provenance-aware removals across 100+ fulfillment centers, reducing inventory fraud by **5.5M removals annually** and cutting return mismatches by **95%**.
- Optimized high-TPS backend APIs by redesigning database queries and introducing request-level caching, reducing database load by **40–60%** and improving API latency by **30%**.
- Improved service reliability and delivery speed by driving design reviews, production readiness checks, and cross-team validations, resulting in **25% higher reliability** and **20% faster release cycles**.
- Resolved critical production failures and edge-case service crashes, reducing fatal error rates to **~5%** and improving overall system stability.

DivineAI

Bhubaneswar, India

Data Analyst Intern

May 2022 – Dec. 2022

- Developed and deployed a data analytics dashboard using **Django** and **Power BI** on **AWS**, enabling real-time business monitoring.
- Enabled data-driven decision-making by performing data cleaning, visualization, and statistical analysis using **Python (Pandas, NumPy, Matplotlib)** to provide actionable business insights.

HighRadius

Remote

Web Development Intern

Feb. 2022 – Apr. 2022

- Developed a full-stack **AI-enabled B2B Invoice Management Application** using **React.js**, **Java Servlets**, and **MySQL** to streamline financial workflows.
- Built a responsive **Material UI** data grid and integrated **Machine Learning** models to enable predictive analysis on large invoice datasets.

Stige

Remote

Software Development Intern

Sept. 2021 – Dec. 2021

- Engineered scalable full-stack web solutions using **React.js** and **Node.js**, optimizing **RESTful APIs** for faster data retrieval and seamless UI integration.

Projects

E-commerce Wellness Startup (Stealth Mode) | React.js, Flask, AWS June 2025 – Present

- * Architecting a cloud-hosted D2C e-commerce platform using React and a Python (Flask) backend, designing RESTful APIs, authentication flows, and secure payment integration on AWS.
- * Leading end-to-end technical execution including frontend architecture, API design, and cloud infrastructure along with UI/UX design.

Ransomware Detection System | Python, ML Oct. 2024

- * Built a machine-learning based ransomware detection pipeline using Python and scikit-learn to classify malicious and benign behavior from system activity features.
- * Performed feature engineering and statistical analysis to improve model separability, achieving **90% detection accuracy** and reducing false positives by **20%**.

EDUCATION

Kalinga Institute of Industrial Technology

Bhubaneswar, India

Bachelor of Technology in Computer Science

July 2019 – May 2023

* **CGPA: 8.77/10.0**

* Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Machine Learning.

Technical Skills

Languages: Java, Python, JavaScript, SQL (MySQL), C++, HTML/CSS

Web & Cloud: Python (Flask), Django, React.js, Node.js, AWS (EC2, S3, Lambda), Material UI

Data & Tools: Pandas, NumPy, Matplotlib, Scikit-Learn, Git, Figma, Adobe Illustrator
