SUMMARY

Software Development Engineer with 3+ years of experience spanning Amazon SDE, startup founding, and software internships, specializing in scalable AWS microservices, REST APIs, event-driven architectures, and production LLM integrations. Delivered \$5.5M+ business impact at Amazon through fraud-prevention and observability systems; currently building a live wellness e-commerce platform.

EXPERIENCE

Aurique Life — Founder & Software Engineer

JUN 2025 – PRESENT

- Founded a digital wellness brand; single-handedly designed and launched a scalable e-commerce platform, achieving \$5K ARR and 25% month-over-month growth.
- Engineered a high-performance, responsive frontend in React and TypeScript, leveraging GSAP and Framer Motion for an immersive, scroll-driven storytelling UI that boosted brand engagement by 30%.
- Built the complete backend using Python (Flask) and AWS (DynamoDB, SQS, SNS, CloudWatch) to independently handle order state management, secure OTP authentication, and real-time metric tracking.

Amazon, Hyderabad — Software Development Engineer (SDE)

JAN 2024 – MAY 2025

- Architected a provenance-aware inventory removal system eliminating counterfeit-swap fraud on FBA orders across 100+ fulfillment centers (Java, Spring Boot, AWS, REST APIs, microservices), cutting return mismatches by 95% — \$5.5M annual fraud reduction.
- Migrated a legacy EC2 polling service to an event-driven, serverless pipeline using Java and AWS CDK (TypeScript); replaced deprecated APIs with reliable failure-path routing, eliminating idle compute costs and improving shipment processing latency.
- Designed and deployed a real-time observability pipeline for Live Site services using a Python worker on AWS ECS Fargate, DynamoDB, and a React/TypeScript frontend, driving the critical fatal error rate down from 90% to ~5%.
- Led code and design reviews in an agile environment across projects, reducing critical errors by 25%, improving code quality, and collaborating with cross-functional teams.

DivineAI, Bhubaneswar — Data Analyst Intern

JUN 2022 – SEP 2022

- Deployed a real-time AWS data analytics dashboard (Django, Power BI) and performed advanced statistical analysis (Python, Pandas, NumPy, Matplotlib), surfacing insights that improved operational visibility by 30%.

HighRadius, Remote — Software Engineering Intern

JAN 2022 – APR 2022

- Created an AI-enabled B2B FinTech invoice platform (React.js, Java Servlets, MySQL) managing 50,000+ records; built a predictive cash-flow forecasting model (Random Forest, 75% validation score) to predict invoice clearing dates.

EDUCATION

Kalinga Institute of Industrial Technology (KIIT-DU), Bhubaneswar — B.Tech (CSE), CGPA 8.77

JUL 2019 – MAY 2023

Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Machine Learning

PROJECTS

JobPilot — Python, FastAPI, SQLite, Ollama, Pydantic, WeasyPrint

Developed a local-first job-search pipeline running entirely on-device via Ollama — sourcing, scoring, and tailoring resumes across 6+ job sources at zero cloud cost — with structured LLM output validation and fabrication guardrails.

LifeOS — React, AWS SAM, Lambda, API Gateway, DynamoDB, Claude API

Implemented a personal life-tracking PWA (React) on a serverless AWS backend (Lambda, API Gateway, DynamoDB), integrating the Claude API for AI-assisted insights and AI-driven task prioritization across five domains: health, sleep, expenses, tasks, and journaling.

Portfolio Assistant Chatbot (PJ) — React, AWS Lambda, API Gateway, CloudFront, Claude API

Launched a live AI portfolio agent (React/CloudFront) with three-layer routing (FAQ to Claude Haiku). Features real-time streaming to autonomously handle recruiter queries, reducing friction and demonstrating production-grade LLM integration.

SKILLS

Languages: Java, Python, SQL, JavaScript, TypeScript

Web & Cloud: AWS (Lambda, API Gateway, DynamoDB, S3, CloudFront, SQS, SNS, ECS), React, Node.js, Spring Boot, Flask, FastAPI, Docker

Data & Tools: Pandas, NumPy, Scikit-learn, Matplotlib, MySQL, Git, CI/CD Pipelines

AI & LLM Integration: Claude API, Ollama (local LLMs), Tool Use / Function Calling, RAG, Pydantic, Prompt Engineering

Practices: System Design, Agile/Scrum, Unit Testing, Code Reviews

CERTIFICATIONS

- IBM RAG and Agentic AI — IBM · Coursera | Retrieval-Augmented Generation, agentic workflows, LangChain
- Generative AI for Software Developers — IBM · Coursera | LLM-assisted development and prompt engineering
- Software Design and Architecture — University of Alberta · Coursera | Design patterns, SOLID principles, system architecture
